<b>Kraft Approval</b>	Signature _____	Date _____	Signature _____	Date _____
-----------------------	-----------------	------------	-----------------	------------

## APPROVAL PROCESS FOR KRAFT HEINZ PRODUCTS ONLY

- All Project Level 1-3 Final Separator Protos<sup>®</sup> require Kraft Heinz Marketing approval.
- Review protos in the light booth location – RMH 7409 (Depth: 740°)
- Complete your review within 24 hours. Anything over 24 hours will result in timeline delays.

**What to Review:**

1. **Overall Layout & Design Intent** – are the images and other graphics well centered and in place?
2. **Color Accuracy** – does the layout reflect the final approved color images/elements and brand colors? What HDT to Review?
3. **Copies** – all copy should be reviewed/approved in ATLAS.
4. **Dies Lines** – all die lines should be reviewed/approved in ATLAS.

**Next Steps:**

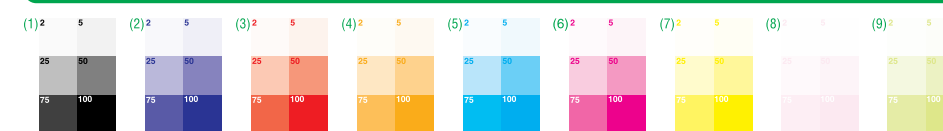

1. Sign and deposit protos in the drawer below the light booth designated for your BU.
2. After you approve, send an email to your GPM confirming your approval.
3. Upon receipt of your approval, depending on the print process, the artwork will need to be stamped and plated or engraved. This work may be executed by the separator company or the printer.
4. Your GPM will inform you of the necessary next steps and timing.

**IMPORTANT IF CHANGES ARE REQUESTED:**

Final Separator Proof Approval is for review of final design intent only! Not for making changes.

- All changes should be made before separations in ATLAS.
- Changes result in delays in timing and additional costs.
- All changes are required to return to ATLAS for team approval.
- Proof and Die Line change require new KHC specs, die lines and copy documents.

\* Project level 4 (simple copy and die line changes) Final Separator Protos are approved by Separator.
